- Firebase
- SQL
- MS SQL Server

EDUCATION

Teacher-programmer

BSUIR: higher education
2020

Technician-programmer

BSUIR Affiliate MRC: specialized secondary education
2017

ABOUT

As an individual with two years of experience as a programming teacher and almost a year as a database administrator/engineer, I have developed a foundation in software development, database management and work with legacy code in real-world applications. Now I'm aiming to transit into a software engineering role, where I can apply my skills and knowledge to develop innovative software solutions that meet the needs of users. I am excited about the opportunity to work, grow and learn with a team of talented developers and contribute to the development of cutting-edge applications.

EXPERIENCE

● Database administrator/engineer

07.2022 - Present | BIP - University of Law and social-information technologies

Ensuring proper maintenance, security and operative capabilities of the local databases. Managing journaling files. Consulting workers on tools and skills required to work with databases. Maintaining, supporting and updating University's website.

- Implemented numerous visual improvements to the University's website;
- Worked with legacy code, refactoring and optimizing its usage;
- Have been developing software for internal utilization using C#, WPF, SQLite.

● Teacher of the special disciplines cycle

09.2020 - 07.2022 | BSUIR Affiliate MRC

Teaching programming languages. Mainly C# (language basics, data processing, GUI creation technologies, introduction to LINQ), to a lesser extent HTML, CSS, Python.

- Lectures, carrying out group classes and laboratory works;
- Preparation of thematic presentations.

RECENT PROJECTS

«Blogster» Web Blog Application

C#, ASP .NET Razor Pages, HTML, CSS, JavaScript, Entity Framework, MS SQL Server | March 2023 - May 2023

Application, designed for creating and managing articles in a blog. Users can create, edit, delete and categorize blog posts using tags, as well as leave likes and commentaries. Post creation process is enriched by the usage of a WYSIWYG text editor that lets users format their posts and add media.

GitHub

«NoteWorthy» Desktop Notes Application

C#, WPF, XAML, Firebase | February 2023 - May 2023

Application, designed for managing notes. Users can create, edit, delete and gather notes in a notebook. Notes creation is achieved via an inbuilt text editor, which provides several formatting and content managing options.
